Professional Summary

Junior Flutter Developer and Information Technology graduate with hands-on experience building cross-platform mobile applications using Flutter and Dart. Skilled in Riverpod, Supabase, REST API integration, authentication, database management, local storage, and responsive UI development. Projects include medicine management, AI-powered disease detection, and real-time sentiment analysis applications.

Education

FAST-NUCES Islamabad **Expected 2028**
Master of Science in Software Engineering

Bahria University Islamabad **2022 – 2026**
Bachelor of Science in Information Technology

Technical Skills

Languages: Dart, Python, SQL, HTML5, CSS3, JavaScript
Frameworks & Libraries: Flutter, Flask, PyTorch, Scikit-learn, Pandas, NumPy, Riverpod
Databases: Supabase, PostgreSQL, Firebase, MySQL, SQLite, Hive
AI/ML & Data: Machine Learning, Deep Learning, NLP, Sentiment Analysis, Data Analysis, Model Deployment
Tools & Platforms: Git, GitHub, REST API Development, Agile, Cross-Platform Development

Experience

Maroof International Hospital **July 2025–August 2025**
Intern – Management Information Systems Department *Islamabad, Pakistan*

- Assisted with application development, software support, and database management in the MIS department.
- Collaborated with the MIS team on IT projects, troubleshooting software issues and supporting departmental systems.

CodeAlpha **December 2024**
App Development Intern *Remote*

- Developed Flutter UI components and integrated backend REST APIs within an Agile development workflow.
- Contributed to debugging and performance optimization for functional, production-ready application modules.

Projects

Agriguard: AI-Powered Rice Disease Detection System | *Flutter, Flask, PyTorch, Supabase* **Final Year Project**

- Built a cross-platform rice leaf disease detection app using EfficientNet-B0, achieving 98% validation accuracy.
- Developed Flask REST APIs for real-time ML inference with response times under 2 seconds; designed a Supabase (PostgreSQL) schema for results and user history and integrated the Flutter frontend with the AI inference pipeline.

SentimentAI: Movie Review Sentiment Analysis System | *Flutter, Python, Flask, NLP, Hive*

- Trained sentiment classifiers on 50,000 IMDB reviews using Logistic Regression (90% accuracy) and Naive Bayes (86% accuracy).
- Deployed Flask REST APIs and built a Flutter interface for real-time sentiment prediction and local data caching.

SmartMeds: Medicine Management & Reminder App | *Flutter, Dart, Supabase, Riverpod*

- Developed a modular Flutter app with Riverpod state management, Supabase authentication, PostgreSQL storage, and user-scoped access.
- Implemented registration, login, password reset, email verification, session persistence, and logout.
- Built medicine management, reminders, dose confirmation, adherence tracking, family profiles, prescription management, stock alerts, statistics, offline support, and accessibility features.

Certifications

Data Analysis with Python – IBM / Cognitive Class June 2026
SQL and Relational Databases 101 – IBM Skills Network / Cognitive Class May 2026
Career Essentials in Generative AI – Microsoft & LinkedIn May 2026
